Rethinking Competitiveness, Structural Reforms, and Macro Policy

Bank of Italy, Rome
5-6 October, 2017

The conference, organized by Bank of Italy, CEPR, and CEBRA's International Trade and Macroeconomics Program, will focus on recent challenges for macroeconomic policies and structural reform design, with an emphasis on micro-macro linkages. Issues of particular interest include the links between international trade and competitiveness, the implications of dispersed productivity growth, and the role of macroeconomic imbalances. We welcome both theoretical and empirical contributions.

Specific topics could be related (but not restricted) to:

- The interdependence between monetary and fiscal policies and structural reforms (the regulation of product and labor markets, trade and FDI, institutions)
- Exchange rates, monetary policy and international trade
- Structural reforms: micro mechanisms and aggregate effects
- External competitiveness, market regulation, and macroeconomic imbalances
- Productivity dynamics: firms' strategies and resource allocation
- Trade and productivity
- Markup determination and price dynamics
- Granularity and macroeconomic fluctuations
- Production networks: the effects on productivity and the transmission of shocks

Keynote Speakers: Thomas Chaney (Sciences Po) & Giancarlo Corsetti (Univ. of Cambridge)

Organizing Committee: Gábor Békés (Institute of Economics, CERS; CEPR); Matteo Bugamelli (Bank of Italy); Matteo Cacciatore (HEC Montréal; NBER); Julian di Giovanni (ICREA-Universitat Pompeu Fabra; Barcelona GSE; CREI; CEPR); Andrea Gerali (Bank of Italy); Dalia Marin (University of Munich; CEPR; NBER)

Funding

Accommodation expenses will be covered for participants on the programme by the Bank of Italy. Participants are encouraged to fund their travel expenses from other sources as only limited funding is available. Where financial support is offered, this will be in accordance with [CEPR's expense guidelines](#), and the Bank of Italy will directly manage and pay for hotel reservations. Following the Bank of Italy's policy, funding cannot be provided to participants from other central banks or policy institutions.
