CALL FOR PAPERS

We welcome paper submissions on any topic of relevance to central bank policy. Areas of specific interest include:

- Central bank mandates, governance arrangements and policy frameworks to guide central bank asset purchases and liquidity support operations
- Interactions between monetary, macroprudential and fiscal policies in a world of low-interest rates and extreme shocks
- The drivers and dynamics of inflation, and the role of expectations
- Demographic change and its implications for asset prices and the macroeconomy
- Climate change, the transition to net-zero and its implications for the macroeconomy and financial system
- Systemic risk in the shadow banking system and the appropriate regulatory response
- Technological change in the financial system, including CBDC, and its implications for monetary policy and financial stability
- Advances in data analytics for central banking.

Those interested in presenting their work at this conference should submit a draft of their paper via the conference website by 23:59 GMT on Sunday 13 March 2022. Abstracts will not be accepted. Please mention whether you are willing to act as a discussant and if you would also like to be considered for a poster session.

Authors of accepted papers will be notified by Friday 1 April 2022. Financial assistance is available for presenters and discussants of accepted papers.
